Envox Lab d.o.o. is a member of Enghouse Interactive, an industry leader in the field of interaction management solutions. We have a long-lasting tradition, high expertise, and extensive know-how tied to serving the Interactive Voice Response and Contact Center industries. The delivery of truly open and advanced contact center solutions is ensured by several complementary products in our portfolio.

Our development center in Zagreb is expanding and venturing into projects encompassing new and cloud-based technologies. To drive this expansion, we are looking for ambitious and creative employees with keen minds and a readiness to learn. Good knowledge of scripting, software quality assurance, and software testing is expected. Fluent English is a requirement due to the nature of our company which spans several continents and countries.

The domains in which we operate as well as the used environments (mainly Microsoft Windows) dictate some of the required skills. Knowledge of VoIP and SIP technologies, IP PBX and telecommunication platforms, as well as low-level understanding of IP-enabled communication in general, are great advantages.

Senior Software Developer (m/f)
